

Henry Russom

Bloomington, IN | hrussom@iu.edu | 317-628-2956

EDUCATION

Indiana University Bloomington | Luddy School of Informatics, Computing, and Engineering *Expected May 2028*
B.S. Computer Science (Artificial Intelligence specialization) and B.S. Informatics
Minors: Business, Spanish | Cumulative GPA: 3.52 / 4.00 | Informatics GPA: 3.91 / 4.00
• Dean's List (Fall 2025); coursework: Software Systems, HCI/Interaction Design, Information Infrastructure; enrolled Fall 2026: AI Programming, Discrete Structures

EXPERIENCE

DMC Insurance | Indianapolis, IN *May 2026 – Present*
AI Software Development Intern (Full-Time, May – Aug 2026; Remote, Aug 2026 – Present)

- Built DemandView, an internal tool for bodily-injury claims adjusters: an AI pipeline that splits ~500-page scanned demand packages into page images and processes them through the Claude API in batches, carrying claim context between calls via JSON handoffs
- Built a hands-off pipeline replacing 4+ hours of manual reading and note-taking per demand package: submit in the morning, pick up a fully processed claim the same day; in production with the bodily-injury claims team since July 2026
- Designed and shipped a medical treatment timeline visualization with severity color-coding, treatment-gap detection, and a cumulative billed-cost chart, giving adjusters a one-screen view of a claim's treatment history
- Accepted a return offer for Fall 2026: working remotely to take DemandView and two additional internal tools to production, driving forward development through the semester
- Run Zoom working sessions with claims adjusters — demoing progress, gathering requirements, and maintaining and updating the tools in daily production use
- Write PHP backend services and design SQL Server schemas and queries for claim, bill, and provider data on Azure infrastructure

Rally Getaway | AI event-booking startup | Bloomington, IN *July 2026 – Present*
Backend Engineer, Founding Team

- One of two founding engineers building the backend that turns natural-language event requests from student and professional organizations into scored vendor matches and bookable packages
- Build the Supabase-backed booking pipeline in TypeScript: event intake parsing, vendor scoring, and automated vendor outreach with n8n

Alt Construction | Zionsville, IN *Summers 2021 – 2025*
Seasonal Associate

- Residential construction across five summers; interpreted between English-speaking site managers and Spanish-speaking crews

PROJECTS

AI Resume Reviewer (Python, OpenAI API) | [GitHub](#) *December 2025*
• Built a Python tool that analyzes a resume and returns structured feedback via the OpenAI API; designed the prompt templates and file-handling workflow

TECHNICAL SKILLS

AI: Claude API (vision, batch document processing), Claude Code, Azure AI Content Understanding, OpenAI API, n8n
Languages: Python, JavaScript, TypeScript, PHP, SQL
Web & Data: React, Next.js, Node.js, HTML/CSS, Supabase, SQL Server, Azure (VM, Data Lake), Pandas, Matplotlib
Tools: Git/GitHub, Figma

INTERESTS

Soccer, weightlifting, cooking, Scrabble, backpacking
